

Innovation Eco System

The 4th and next transnational meeting of the SmartImpact network is in Porto on 27th and 28th June 2017. Here the network will look at how a city can create a thriving innovation ecosystem. We will learn from the experiences of Porto which has been very successful in doing this and the network will visit real examples of how the city can work with their innovation sector.

On day 2 of the meeting, the network will join the Morgenstadt consortium meeting where we will look at smart solutions for district challenges. Morgenstadt is a collaborative project looking at the transformation of our cities into smart and sustainable environments of the future.
