

What resources for your ULSG?

To develop the Local Action Plan (LAP), the URBACT Local Support Group has different kind of resources at their use. These resources are both technical (budget) and knowledge based (thematic guidance given by experts, exchange and learning meetings with national and international peers).

ULSG specific budget

In an URBACT project, a specific budget of 70.000 Euros is dedicated to ULSG activities. This financial envelop is available for various expenses like: travel costs, meetings with the other project partners, translation needs etc).

Lead expert

He/ she is a resource for each partner and plays a key role in each URBACT II project by providing support during the lifecycle of the project both in terms of thematic expertise and working methods. The Lead Expert also contributes to the overall Programme level activities on behalf of the project.

Meetings with project peers

ULSG members are invited to participate and exchange in transnational meetings with the different partners of the network. Each partner gets to know the practices used by the others and goes back home with new ideas.

Meetings with national peers

At national level, other ULSGs might not work on the same theme of yours but could be helpful in exchanging on tools, best practices, methodology within the URBACT framework. An interactive platform has been set up and offers you the possibility to exchange with other ULSG members in your national languages, to find tools and good practices, etc.
