

Sosnowiec łączy

Sosnowiec – what we have learned through our transfer process

Shining stars

Eureka moments

Invisible victories

Our regrets

Obstacles in our way

Bootcamp in Ljubljana - better understanding of the Bee Path and meeting the other partners in person

Fruitful individual discussions with ULG members.

Having the possibility to learn from the experience of cities that already transferred the good practice

Discovering that there is so much interest in project's topics among local stakeholders

Discovering that we have an active beekeeper's association in Sosnowiec.

Composing the project's team and receiving strong support for the project from local stakeholders.

Preparation period (Jun. – Oct. 2021)

We have a "Bee Path in Sosnowiec" logo

Start of the promotional and awareness raising campaign

Discovering the character of professor Władysław Szafer - one of the most celebrated Polish naturalists

Discovering that Sosnowiec owes its name to pines Sosnowiec = Pine City

Launch of the educational programme for schools and kindergartens in Sosnowiec

Seeing first synergic effects - cooperation among ULG members is surprisingly effective and active

"Let's Wake Up Bees!" - our public event targeting kids and parents was a big success

URBACT meeting in Paris was a great opportunity to improve knowledge of the URBACT method and tools and to network

Media Library in Sosnowiec could develop an educational polygon

Engaging other European cities during the World Bee Day's celebration in Sosnowiec.

The positive opinion of the Polish FLC was a big success for our Financial Officer

Sosnowiec organized the World Bee Day for the first and the success of the event was noticeable

Educational polygon was launched as a perfect educational tool available for organized groups of visitors and individual users of the Media Library.

"From the city of pines to modernity" - redefinition of the Bee Path in Sosnowiec

Dissemination of information about the Bee Path Net Reloaded project in Poland and abroad

The final design of the Bee Path map was delivered.

Sosnowiec Honey Harvest event organized with big success

In close cooperation with our ULG we developed our Long-term Action Plan

Educational Polygon in full operational mode

Greenery Management Municipal Company getting involved

Rich summer programme of bee-themed events organized by ULG members

Transferring good practice from Ljubljana and development of URBACT local group in our city (November 2022 – May 2022)

Development of bee-path in our city and dissemination (June – December 2022)

As we joined the project as the replacement partner, no ULG members could participate in the Bootcamp

No pre-financing is available, making implementation more difficult

Administrative burden - EU project requires complicated and time-consuming internal procedures

Unfortunately, not all planned ULG members could attend the city visit to Osijek (Croatia).

FLC training revealed even more complicated procedures and documents that would be required by the FLC to validate our expenditures linked to the project's activities

Unfortunately, the progress of development of the educational programs slowed down

A competition for schools hasn't been launched

Greenery Management Municipal Company still not interested in joining the ULG

COVID 19 and the military conflict in Ukraine are disrupting the transfer process

Maruška's and Osijek team absence on Bergamo city visit - People matter!

Osijek team not coming to Sosnowiec - People for sure matter!

The BPNR movie making - do not plan such activities when most people are on holiday...

The military conflict in Ukraine continues...

Our project approaching its end...

Sosnowiec – what we have done through our transfer process
