The VILAWATT experience in Nagykanizsa

The understanding phase of the project

- + Energy transition why and what?
- + Understanding the guidelines and policies beyond
- + Mapping the landscape and stakeholders

Challenges in adapting (2nd phase)

- + The stakeholders (ULG)
- + Motivation and local politics

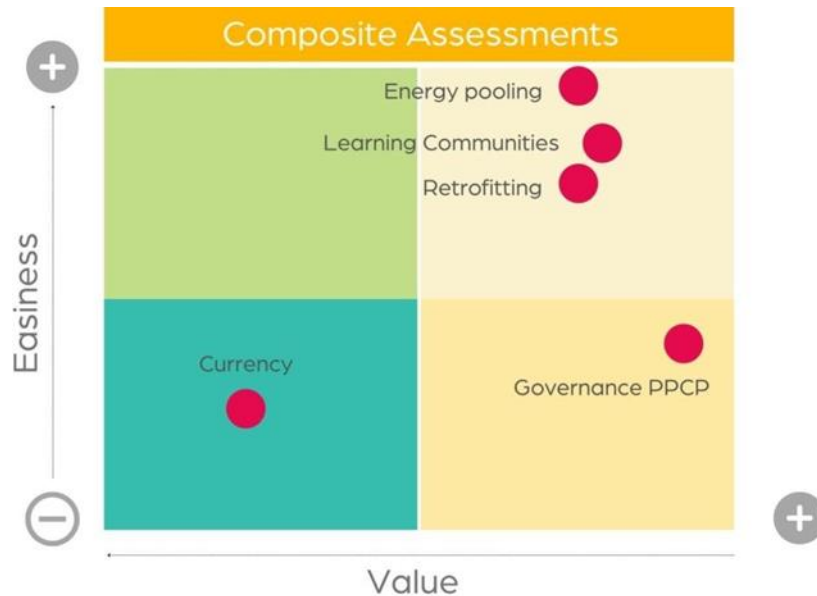

Preparing for reuse (3rd phase)

- + EU legislation and directive
- + Framework of the national policy
- + Energy governance in practice
- + Government's ET supporting scheme (RRP and the revised NECP 2021-30)

The future of re-use

"It will be seen that Energy Communities play a central role in the transfer of the VILAWATT project to partners".

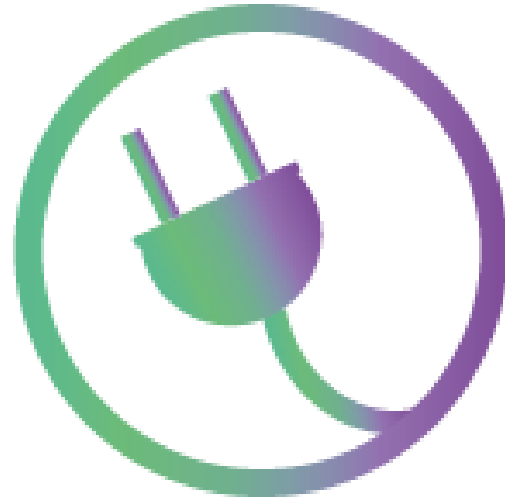

VILAWATT final network report

" transfer cities to reflect on the feasibility (ease of adoption) and interest (value of adoption) of each VILAWATT pillar ".

[Flying components

- + PPCP (energy communities)
- + Legislation and regulation (national level)
- + Financing & incentives
