A TIGER MOSTQUITO

Strength: I have adapted very well to the urban environment and I can survive many circumstances.

Weakness: I'm sensitive to pollution and drought.

Urban service: I am a great pollinator.

A RAT

Strength: I'm very active in terms of reproduction, so there's no risk of my congeners disappearing.

Faiblesse: No one likes me :'(

Service urbain: I am one of your best garbage collectors.

A BEE

Strength: I live in a community, and we're very productive for our own survival.

Weakness: I am very sensitive to pollution.

Urban service: I am an amazing pollinator.

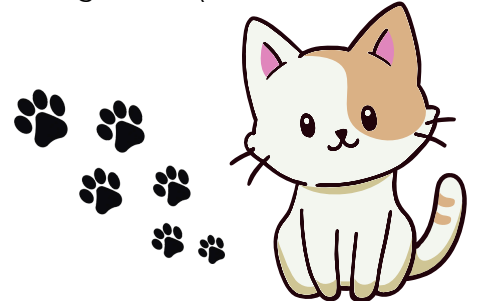

A CAT

Strength: I am super cute but also very independent !

Weakness: I'm in constant danger of being run over, but if I don't go out, I'm very unhappy.

Urban service: I bring great well-being to my owners. I can be used for bird regulation (sometimes too much).

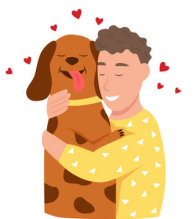

A DOG

Strength: I'm man's faithful companion, I bring my owner great emotional happiness.

Weakness: Just like human beings, I'm also affected by air pollution, which can damage my health.

Urban service: My urine and excrement are rich in nitrogen and phosphorus, making them beneficial to the soil (although they can become a problem when concentrated in one place).

A BLUE TIT

Strength: With my beautiful colors, I'm the star of feeders and gardens.

Weakness: Excessive use of insecticides is bad for me, because it eliminates my pantry.

Urban service: I'm a great acrobat, an insectivore and I contribute to the ecological balance of your gardens.

A CHILD

Strength: I love learning, discovering and understanding the world around me while having fun!

Weakness: I'm in the process of building myself, of growing up, and the world around me is potentially going to impact me for the rest of my life.

Urban service: Thanks to me, politicians are taking my needs into account to improve my quality of life, and this has a positive impact on the city's ecosystem as a whole.

A TRUCK DELIVERY MAN

Strength: I know how to cope with stress and be patient in traffic jams.

Weakness: Today, delivering goods in urban areas has become a real headache, with urban concentration, road saturation, traffic jams and so on.

Urban service: I'll bring you everything you need to live on time, and don't forget, during lockdown I made sure you had enough to eat every day.

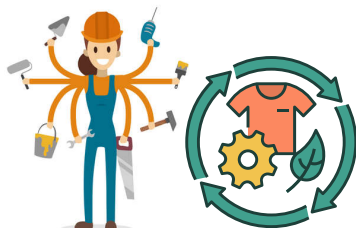

AN INHABITANT OF A DEPRIVED AREA

Strength: I'm mostly resilient and able to adapt to daily challenges of all kinds. Together with my neighbors, we show great community solidarity.

Weakness: I may be faced with socio-economic difficulties that have a direct impact on my ability to meet my basic needs and those of my family

Urban service: My lifestyle is very sober and I favor the circular economy and repair.

AN ADULT CITIZEN

Strength: I and my fellow human beings have the power to act, to change the ecosystem.

Weakness: I can also fall ill, and I'm sensitive to climate change, pollution and so on.

Urban service: I'm helping to change urban ecosystems.

THE C.E.O OF AN INDUSTRY

Strength: I have the expertise, the money and I can influence local decisions.

Weakness: I'm vulnerable to major events (such as lockdowns/COVID, industrial unrest), competition from cheaper countries, etc.

Urban service: I play an active role in the local economy, as well as in the national one. I am one of the biggest job providers in the region.

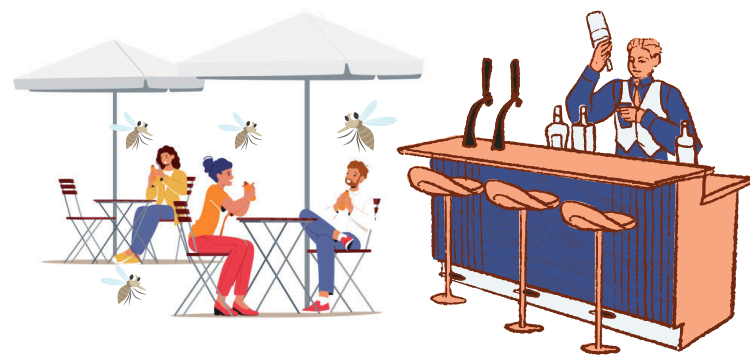

THE OWNER OF A BAR

Strength: I have a great location with a nice terrace!

Weakness: During summer my terrace is invaded by mosquitoes, and every year I lose some of my customers.

Urban service: I play an active role in the local economy, creating jobs, social ties and joy.

THE SEA

Strength: I'm a living ecosystem, home to a wealth of biodiversity and a wide range of leisure activities. I cover a large part of the planet.

Weakness: I'm sensitive to climate change and pollutants (which change my chemical composition).

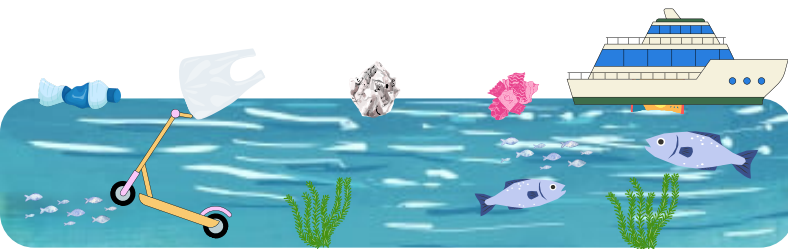

Urban service: The Earth and all type of lives depend on my health and well-being

A RIVER IN A CITY

Strength: I'm a living ecosystem, home to a wealth of biodiversity and a wide range of leisure activities.

Weakness: I'm very sensitive to all types of pollution, and people tend to think I'm a garbage can :(

Urban service: I bring freshness, leisure, food, mobility, I participate in the water cycle, etc.

THE GROUND

Strength: I'm a living ecosystem harboring great biodiversity.

Weakness: I'm very sensitive to all types of pollution.

Urban service: I bring freshness, food, I participate in the water cycle & habitat for biodiversity, etc.

THE AIR

Strength: I am everywhere.

Weakness: I'm sensitive to climate change and pollutants (which change my chemical composition).

Urban service: All living beings need me to live.

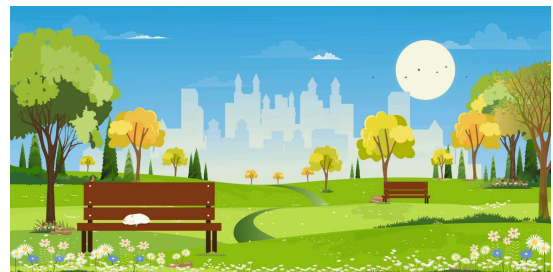

A BIG URBAN PARK

Strength: My diversity is my strength, and I can rely on all my components to react in the event of a problem.

Weakness: I am vulnerable to climate change which can make me lose some of my biodiversity.

Urban service: I provide great services to the whole city, but the main thing is that I'm its lungs.

A BIG MINERALIZED SQUARE

Strength: I am a huge square with a big history.

Weakness: The metro runs underneath me, so I'm not free to welcome whoever I want on my floor, that would make me too fragile.

Urban service: My special character lies in my ability to bring people together. I'm a place for fun and culture, as well as a landmark. Unfortunately, my mineral nature makes me unlivable in summer.

AN URBAN TREE

Strength: I'm very independent and able to develop on my own despite unfavorable conditions.

Weakness: In an urban environment, I lack sunlight and space. I am also the toilets of the dogs (which is bad for my health).

Urban service: I provide many ecosystem services, such as regulating temperature, improving air quality, providing a home for many species, and so on. You all need me!

Urban service: I provide many ecosystem services, such as regulating temperature, improving air quality, providing a home for many species, and so on. You all need me!

URBAN MEADOWS

Strength: Our diversity of vegetation means we can easily adapt to climate change.

Weakness: Management practices such as mowing and the use of pesticides are unbalancing my structure.

Service urbain: We are an essential food source for many species and a breeding ground for invertebrates. We are also one of the planet's most stable carbon sinks, provided we remain in our natural state or are carefully managed.

Service urbain: We are an essential food source for many species and a breeding ground for invertebrates. We are also one of the planet's most stable carbon sinks, provided we remain in our natural state or are carefully managed.

URBAN HEDGES

Strength: We adapt easily to any environment.

Weakness: We are sometimes referred to as "green concrete" because, unfortunately, we can be monospecific. This makes us vulnerable to disease.

Urban service: We are true "ecological Towers of Babel", and as committed players, we work to beautify the city, protect urban biodiversity, reduce urban pollution and regulate the urban water cycle (unless we are too monospecific)...
